Cattle Receipts Light and Market Unchanged.

The supply of hogs yesterday was not large but about what was expected. The buyers were early on the market and they wanted all the hogs, but two car loads were held over occurse sellers re-fused to take any and all blds. There was some very common hogs among the offer-ings, but taking the average it was about event to that of the previous day. There equal to that of the previous day. There was a sprinkling of good hogs in most of the car loads and one full car load of good heavy hogs. The market opened five to ten ceats lower on common hogs but by the time some good heavy porkers were offered there was more strength er staid until the last hog was in the yards before he got his order filled. The market seemed to be satisfactory to the sellers and there was no wickers. fellows who would not sell admitted that the buyers had made liberal bids all things considered but they expected that the market would be higher today. The top load brought \$6.10 which was only 2% cents under the top the previous day, but the hest load the previous day was that

CATTLE.

The supply of cattle yesterday was hardly sufficient to cause the buyers to get on their working clothes. The supply is not nearly equal to the domand, and the country shippers say the oig run of cattle is already it. Spring is guting so close at hard that the farmers refuse to sail cattle freely like they old several weeks ago. Good feeders would bring strong prices, and there are more buyers than sellers for stockers. Good butcher cows and hefers are also in deraund, and more than is arriving could be sold.

STOCKS AND BONDS.

New York, Feb. 27.-The most active stocks in today's markets were among those rather better known to the average speculator than those which have occuded in greatest attention for several a large part in the market, particularly in the width of their price movements, for than at yesterus, in the width of their price movements, by firm cables. The crowd, however, linto activity today and were pushed took the selling side early and an easy smartly upward, and advances continued in some others recently awakened into local selling was manifest for a time. The local selling was offset by a fair commission, house demand, the southwest buying ligerally and professionels later came and hold intentions. As days, but the obscure specialties still had a large part in the market, particularly were offered there was more strength activity. Still others reflected the passes shown and the best hogs sold steady to a large and got the speculative movement and the shade lower but closed strong. Taking all taking of profits, after which market support was withdrawn and the prices was prices advanced shorts were forced to the buyers and could be southed as much money as the same grades the previous day. Chudahy and Ar-large and persistent buying of Colorado mour were the buyers and Cudahy's buyers and could be southern gives color to the creating that not the last hog was in the rumors that coultrol of the road is south. Evansylle & Terre Haute is accepted as confirmatory of reports recently current of a consolidation. With these two examples as a basis, rumors of many other absorptions and consolidations of minor rallroads received ready cyredence. There was a resumption of Tacasiay's rise in 1-26 higher at 61-3-8c. Receipts were much inside interest, but without explanation. Chesapeake & Ohio and Norfoik & Western were lifted on the reports of ish tendences. Cables started slightly

tion. Chesapeake & Ohio and Norfolk & Western were Hited on the reports of the extraordinary demand for bituminous coal. There was support from Inside sources for Missouri Pacific but the large liquidation continued in that stock, supposed to be the remit of recent duals of a large holder. Amalgamted Copper and Tonnessee were action. a large holder. Amalgumted Copper and Tonnessee were active, but irregular, but of these stocks ended the day unchanged. The market as a whole, continued slug-gish and neglected. The dubious condi-tion in which the Northern Securaties company is kept by the pending littention against it and the uncertainties of the money outlook, are amply sufficient to account for this state of affairs. The consultations now going on between those interested in the Northern Secureties company, and the fact that some of the banks are inclined to question the efferings of Northern Secureties stocks as collateral accentuate this feeling. The export today of \$25,00 (so in gold afforded no apparent relief to the exchange market, indicating that the gold went to meet maturing obligations abroad and that no exchange bills were sold against it. The drop in Chicago exchange to 50 cents discount indicates clearly the pressure for currency at that point, Although no effect resulted in the money market, the operations of the will cause higher the second induced to the process of the will cause higher. orgultations now going on between those interested in the Northern Secureties fect resulted in the money market, the continuance of this will cause higher money rates without fail.

A LEGACY OF THE GRIP.

Chilally has moved all the good machinery in his backing house in Nashville to this city, and some of it will be put to use hors.

On it was putting the roof on one half of his hig cooler yesterday. The other part of the cooler will be built a story higher. The doors are also being laid in the building, and when one is in it he can discover its immense size. The big new Ferris wheel is in place in the hog-killing room, and the floors are all laid with brick. Peerde are beginning to discover that so far as this city is concerned the Poid fire was a bleasing in disguise. The new house will be about equal to three packing houses such as the one that was harned. Now that the street car company is getting new cars and talking about other in grooteners, it would be a good time to consider the matter of extending the line to the Union stockwards.

Some of the shippers of stock to this matret kiek about the sullryads keeping their stock down in the city from two to three hours before sending them to the sinckyards. It is ecaseperating to the highers to have their stock held down town until the markets close, when they prive in the city in plenty of time to have sold.

Beggs' Cherry Cough Syrup

If you have a cough or a cold or any throat or pulmonary troubles, you don't need to be told that you want to be cured.

You don't need to be told that it's the most dangerous thing in the world to trifle with such insidious and dangerous

diseases. What you want to be told is how you can be cured quickly and permanently. This is precisely what this advertisement tells you.

Beggs' Cough Syrup is what you want. It will help you at once. You will feel better in a few moments. You will feel well in a few hours. This isn't guess work nor mere advertising talk. It is the
